# Software Change Approval

Document ID: NL-22
Version: 1.0
Status: active
Owner: Engineering
Effective from: 2026-10-01

Synthetic example document. Not a real company policy.

## S1: Requirements

A production change requires an approved pull request, successful automated checks and a documented rollback option. The author of the code must not be its sole approver.

## S2: Deployment window

Regular deployments take place on Tuesdays and Thursdays between 10:00 and 14:00 German local time. Emergency changes outside that window require incident lead approval and a retrospective review on the next working day.
